

Rocla's products, engineering expertise and customer service are helping customers resolve complex challenges on a daily basis. The case studies below showcase a few of these.

For a broader selection of stories, you can [browse the latest issue of our magazine, Rocla Works](#), or order your own printed copy [here](#).

COLLECTIVE THINKING AT SEAFORD MEADOWS

Rocla's ability to fast-track the design and production of a large on site detention system and work closely with the contractor and consulting engineers for Adelaide's Seaford Meadows subdivision has resulted in a superb outcome for all stakeholders.

CUSTOM PRODUCTS HELP FARM TO TRANSITION

When the property manager for a 13,000 ha farm in NSW transitioning from growing rice to cotton needed to rethink the farm's irrigation to suit its new crop, Rocla's ability to custom-make quality products within specified timeframes was key.

MULTI-PLATE™ STEEL PLATE HANDLES THE LOAD AT MANGOOLA MINE

When mine developer Xstrata engaged Downer EDI Engineering to design and construct a 506m reclaim tunnel and associated headwalls for an open cut coal operation at Mangoola mine NSW, Rocla's Multi-Plate™ corrugated structural steel plate was chosen as the most cost effective and efficient solution to meet the specified clearance envelope, cover and load requirements.

SAVINGS ALL ROUND ON STORMWATER UPGRADE

When Rocla's NZ-based pipe business was called upon to supply the pipe and manholes for a brand new subdivision, they came up with a solution that was both cost effective and environmentally friendly.
